Poly-L-Lysine Coating Solution (0.1%)

Cat.No.	Unit
TM061	25 ml

Cat. No.	TM061
Name	Poly-L-Lysine Coating Solution (0.1%)
Description	Poly-L-Lysine is a positively charged synthetic amino acid with one hydrobromide per unit of Lysine. It is commonly used as a thin coating on tissue culture surfaces. Poly-L-Lysine coating promotes the attachment and adhesion of many cells in vitro. It does this by increasing the electrostatic attraction between the surface and the cells.
Unit	25 ml
Sterility	Pass
Appearance	Liquid
QC	Each lot has been fully tested and optimized for its ability to support in vitro cell culture. The testing parameters include: adherence rate (where applicable), typical morphology, and metabolism of the tested cells. Additionally, the media has been tested for sterility, pH, osmolality and endotoxin levels.
Storage Condition	Store at 2-8°C. Stable for up to 12 months from shipment date if maintained at 2-8°C. Do not freeze.
