Anti-HA Tag Antibody (Mouse Monoclonal)

Cat.No.	Unit
G036	100 µg

Cat. No.	G036
Name	Anti-HA Tag Antibody (Mouse Monoclonal)
Unit	100 µg
Clone	HA.C5
Category	Tag Antibodies
Application	WB,IHC,IP,ICC/IF
Raised In	Mouse
Clonality	Tag
Reactivity	Other
Description	Hemagglutinin is an antigenic glycoprotein found on the surface of the influenza viruses, as well as many other bacteria and viruses. It is responsible for binding the virus to the cell that is being infected. The name hemagglutinin comes from the protein's ability to cause red blood cells (erythrocytes) to agglutinate in vitro.
Immunogen	A synthetic peptide from influenza hemagglutinin epitope (YPYDVPDYA) coupled to KLH.
Isotype	IgG3
Recommended Dilutions	ICC/IHC/IF/IP 1:200 dilution. WB 1:500-1:1000 dilution.
Storage Buffer	PBS, pH 7.4 with 0.05% sodium azide.
Storage Condition	This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Expiration date is one (1) year from date of receipt.
Formulation	Liquid
Specificity	HA-tag monoclonal antibody. Recognizes HA-tagged tagged proteins overpressed in cells, including both amino- or carboxy-termini of targeted proteins in transfected mammalian cells.
Guarantee	abm guarantees that all our Anti-HA Tag Antibody (Mouse Monoclonal) will perform as described on this product webpage, if this is not the case we will provide you with a one-time replacement at no extra cost. Documentation and explanation of experiment conducted will be required when submitting a claim for replacement.

Caution: *This product is for research use only and is not intended for therapeutic or diagnostic applications.*
